Beauty

Part I   Demo in class on **9/28**
Part II   Demo in class on **10/5**
Final   Demo in class on **10/14**

The goal of this project is to make an interactive, digital experience or game that is beautiful. You will practice working in a team and continue to develop your skills building experiences in Unity. The specific teams are listed below.

Constraints:
- Your experience must be interactive. You can't simply make a long cut scene. We're practicing the process of making interactive experiences and games.
- Your experience must be beautiful. I'd rather a beautiful, interactive experience than an ugly game. That is, we will have a very loose definition of "game" for this assignment.
    o You can define beauty in any reasonable manner. If you're unsure, ask Ira.
    o Examples include games like flOw and flower, but Go could also qualify. Be creative!
- No shooting violence or pornography.

When showing your game to the class, you must provide a URL where your game can be played. Anything on the website will be considered, including instructions for the game, story, and anything else you put there. Anything you send in an e-mail or PowerPoint will not be considered. Put it on the webpage!

Part I
Provide a URL to the class that includes a Unity game or interactive experience that is beautiful. The experience will obviously still be rough because you will have only had one week to work on it. We will review each game in class and provide feedback.

Part II
Using the provided URLs, we will review each game in class. You should be two-thirds done with the project at this point!

Final
Provide a URL to the class that includes a Unity game or interactive experience that is beautiful. Your final website should include:
- The full names and roles of your team members
- Access to the source code and art for the game (via GitHub, Google drive, etc.)
- A screenshot of the game
- A ~60 second gameplay video or trailer.

Team A	Team B	Team C	Team D	Team E
